OUR OXYGEN AND XP-X HELMETS FEATURE M-FORGE[®] COMPOSITE TECHNOLOGY FOR THE LIGHTEST WEIGHT AND BEST PERFORMANCE POSSIBLE.

#MForgeCompositeRevolution

LIGHTEN YOUR LOAD

Up to **30% lighter** than traditional carbon fiber and tricomposite helmet shells, while meeting the same international safety standards.

M-FORGE[®] Composite helmet technology puts **less strain** on a rider than comparable helmets on the market for a **more comfortable riding experience**.

ENGINEERED FOR YOUR PROTECTION

M-FORGE[®] Composite technology starts as a fabric, and through a heat-pressure process creates a hardened shell capable of **meeting the most stringent safety standards** in the industry - at a fraction of the weight of traditional helmet shells materials.

M-FORGE[®] Composite offers **improved penetration, impact resistance** and **shell resilience** over the competition in the most extreme conditions.

RESPONSIBLY AFFORDABLE

M-FORGE[®] Composite technology delivers the world's most advanced head protection at an affordable price.

Every piece of M-FORGE[®] Composite helmet shells are:

Designed smarter with life-extension and waste prevention in mind

100% recyclable

Use a clean manufacturing process

Committed to the Paris Climate Agreement

THE SCIENCE OF LAYERING

Whether you're into deep snow, backcountry or trail riding, staying warm and dry is essential. It's all about layering; a science we've perfected.

Build your perfect combination of base, mid and outer layers with our easy-to-understand rating system to help you dial in the perfect balance of comfort and performance for you.

LAYERING SYSTEM SHOWN

- 01 Thermal Base Layer
- 02 Packable Jacket
- 03 Helium 3D Jacket

AT THE CORE OF EVERYTHING. 01 BASE LAYERS

It all starts here; it's essential to stay dry, to stay warm. Base layers wick away moisture from perspiration against your skin, the first crucial step in preserving warmth.

P.38

COMFORT THAT ADJUSTS WITH YOU. 02 MID LAYERS

Using a mid layer allows you to adjust your ideal warmth level. Winter weather is notoriously variable. Stay ahead of the game, stay comfortable.

P.36-37

YOUR FIRST LINE OF DEFENSE. 03 OUTER LAYERS

Keep out the elements and hold in the warmth. We offer outer layers engineered with the highest performance materials like Sympatex, PrimaLoft and RPM technologies to match your riding style and needs.

NON-INSULATED P.22-24, 30

INSULATED P.25-35

SEE THEM IN-STORE You will find the same rating system in-store on our color-coded product labeling, with additional features and characteristics.

TECHNOLOGY GUIDE

Our riding gear and technical wear are built with advanced technologies that protect you through warmth, waterproofness, lightness and breathability.

GARMENT WEIGHT

- 150 g/m² 250 g/m²
- 165 g/m² 300 g/m²
- 200 g/m²

The higher the weight of your BASE or MID LAYER, the warmer it is.

PERFORMANCE METER

- BREATHABILITY** This OUTER LAYER rating indicates how effectively perspiration is moved away from your body and out of the garment.
- WATERPROOFNESS** This OUTER LAYER rating reflects the technology used, sealed seams, zipper types and more.
- WARMTH** This rating is a key information for your BASE, MID, and OUTER layers, and considers all aspects of the garment, including insulation, waterproofness, windproofness, breathability and fabric construction.

PROTECTION TECHNOLOGIES

Membrane

SympaTex® Sympatex waterproof/windproof/optimally breathable membrane actually gets more breathable the harder you ride. Gear with Sympatex doesn't have pores like other membranes and can be washed over and over without clogging or loss of performance. SEE P.21

Coatings

RPM and RPM MAX coatings provide maximum waterproofness, windproofness and breathability no matter how tough the ride or how cold the environment.

Insulation

PRIMALOFT®

A high-performance insulation with the full spectrum of benefits to brave the elements. Committed to delivering feel-good products that empower you to stay in the moment. Warmer, drier, softer and more compressible than any other synthetic insulation. SEE P.31

THERMALLOFT

Warmth, softness and lightweight comfort from recycled materials.

Fabric

CORDURA® FABRIC

CORDURA fabric is often added to garment zones that need additional durability, such as arm and back hem, inner legs and crotch for tough yet flexible comfort.

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Height: Without shoes, standing with heels and back against a wall.

Head: Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

Arm length: Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Chest/Bust: Measure under your arm, around the fullest part of your chest.

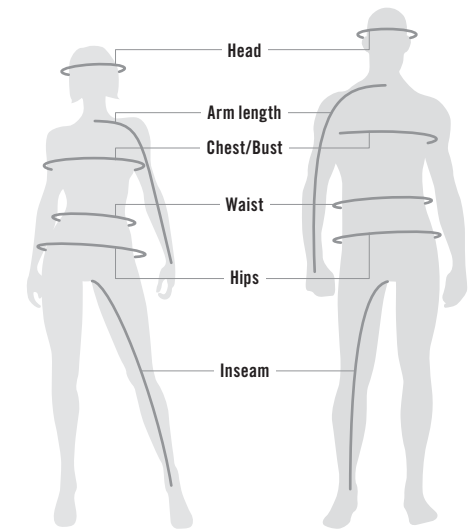

Waist: Measure around your waist at the narrowest place.

Hips: Across the fullest part of the seat.

Inseam: Without shoes, from crotch to the floor.

Gloves: Measure palm width.

Boots: Foot length from heel to toe.

WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is THE CODE you use to complete the part number on your order.
 Example: 440 227 90
 Size: M = code "06",
 Therefore 440 227 06 90
